

Not all eDiscovery providers are created equal.

We provide sophisticated, affordable results.

How We're Different	Why it Matters to You
1) Founded and led by practicing litigators.	You receive defensible, disciplined ESI productions because what you do with an eDiscovery work product isn't theoretical to us.
2) Act as national eDiscovery counsel.*	Unmatched support to mitigate discovery gamesmanship during motions and depositions.
3a) Financially independent.	There is no pressure to over-engineer a solution to please outside investors.
3b) No per GB charge for processing in Relativity.	Discovery is expensive; preserve your client's legal budget.
3c) No per GB charge for productions in Relativity.	See above.
3d) No additional charges for analytics in Relativity.	Notice a theme yet? You pay GB/mo. hosting and for Project Manager time. No line item shenanigans.
4) All project managers and document reviewers are licensed, US-based attorneys.	Combining small teams of experienced reviewers with appropriate technology yields greater consistency in document coding and lowers QC and project management costs.
5) DiscoveryMaster is standard on all review projects in Relativity.	Immediate insights regarding key documents, project completion dates, and budget performance, along with lower project management costs.
